

Information Architecture (IA) Training Class

Information architecture (IA) is an often-overlooked area of website and app design, but without a well-planned information hierarchy, designers risk creating applications and sites that are confusing or make content virtually inaccessible. In this dynamic, hands-on, session, emphasis is placed on building an effective information architecture created from multiple sources of information. These sources include user research, scenarios, features, and user priorities.

What you'll learn in this IA training course

In this session, participants build an information architecture for a class project to create an experience up to the point of testing it's information hierarchy. The goal of this exercise is to help participants realize the importance of user research, persona, and feature building, that ultimately result in a successful hierarchy of information that meets their business objectives.

Overview of an information architecture

The importance of the underlying information structure Information architecture design patterns and how they relate to your experience Flat and hierarchical information structures

The foundation of an information architecture

Primary research
Personas, stories, and user flows
Feature building

Best Practices for Information Architecture Design

Designing your IA based upon user needs Establishing a clear purpose based upon UX brief and other integrated data Integrating and prioritizing the user needs in order to build effective navigation Building-in consistency

Methods and techniques for creating the IA design

White boarding and post-its Card Sorting-Open, closed, and reverse Site Maps and Outlines

Testing your Information architecture

Wireframes and prototypes Active observing Passive observing Online review

Audience for this IA training course

This session is for anyone involved in the user experience process, from researcher or analysts to visual designers and stakeholders.

Information Architecture training course duration

This class is 1-day. 9:30 am -4:30 pm
