Adobe Illustrator for Apparel Design training course

In this Adobe Illustrator for Apparel Design training course you’ll learn skills that designers need in order to create garment designs. You’ll understand how to create and then save for re-use complex items such as zippers, patterns, and buttons. This course is focused on using Illustrator as a tool to create designs, and also sharing designs so they can be put into production. Our instructors have worked with many of largest fashion and apparel design firms globally, including working with clients across the U.S., Europe, and Asia.

What you’ll learn in this training course

- Maximizing the Illustrator workspace
- Working with artboards
- Effective use of selections
- Building shapes for your apparel
- Taking advantage of Smart Guides
- Creating custom shapes with the Shape Builder tool
- Using Pathfinder
- Creating shapes by reflecting content
- Working with strokes
- Creating and saving custom stitching
- Creating custom brushes
- Pen tool tips and tricks
- Using colorplots
- Creating and adding gradients
- Creating global colors
- Creating and editing patterns
- Taking advantage of Live Paint
- Using your files in other applications (eg: Photoshop)

Audience for this training course

This course is designed for apparel and design professionals who need to create individual garments and fashion lines. Previous experience with Illustrator is useful, but not required. If participants plan to use Illustrator for more than apparel design, they should start with the introduction to Adobe Illustrator course.

Training course duration

This class is two days in length. It runs from 9:30 am- 4:30 pm. Lunch break occurs approximately at noon until 1 pm.

Training course curriculum

This training course uses materials created by our instructors specific to apparel design, and includes content from our Adobe Illustrator Digital Classroom book. Courses are delivered by the instructors that write this best-selling book.
