

Google Tag Manager Course Outline

Learn to use Google Tag Manager to apply and organize on-page tagging, whether for Google Analytics or other analytics, advertising, remarketing, or user experience tracking. Discover how to apply tags to track interactions more easily on your website. Find out how to place tags and tracking code on pages without needing developers or access to the entire website. Learn to track information about user behavior that goes beyond standard analytics. Learn to use GTM to gain more visibility into specific on-page behaviors, as well as managing and organizing various tags so that a site runs efficiently.

Google Tag Manager training topics covered:
